PHD or MSc STUDENTSHIP IN PLANT ECOLOGY

We have an opening for a student with an ecological background to pursue a graduate degree in arctic-alpine, grassland, or forest systems (<http://tinyurl.com/ecologystudent>).

Recent publications from our lab:

- Arctic alpine vegetation change over 20 yr. *Global Change Biology* 15: 1676
- The invasive grass *Agropyron cristatum* doubles belowground productivity but not soil carbon. *Ecology* 92: 657
- Climate variability alters the outcome of long-term community assembly. *Journal of Ecology* 96: 346.

Potential research projects include growth-form effects on N cycling at contrasting altitudes, biological invasions, and vegetation restoration.

This full-time position starts in September 2013 with full salary and generous research support. Applicants need a driver's license and an ability to work independently, especially in the field. The position is based in Regina, Canada with fieldwork in Canada and Sweden.

Application deadline is November 15 2012. Please email a letter, résumé, contact information for three references, and unofficial transcripts to scott.wilson.uregina@gmail.com.
